APPENDIX 302A
MEMORANDUM OF UNDERSTANDING
HOME BUILDERS INSTITUTE (HBI)

Where the Home Builders Institute (HBI) Job Corps Program operates, the provisions of this Memorandum of Understanding (MOU) apply to HBI Job Corps officials and staff, and Center Directors (including designees). No deviations from the MOU are authorized without the specific and written approval of the Job Corps National Director.

Wherever the acronym HBI appears throughout this MOU, it represents the HBI Job Corps program. Should any differences exist between this MOU and the Statement of Work (SOW) for HBI, the provisions of the SOW take precedence.

1. PURPOSE

This document constitutes a working agreement between HBI and the ___________ Job Corps Center Director entered into this ______ day of ________, 20__. (Appropriate signatures are required at the end of this Agreement.)

2. CENTERS, PROGRAMS, SLOTS, AND RATIOS

HBI must provide 148 contracted CTT at 72 centers (including USDA Forest Service Civilian Conservation Centers [CCCs]), to provide training for 3,502 slots (these figures are valid as of January 2014).

To modify any of the above figures, HBI is required to follow the Career Technical Training Change Request process established by the National Office of Job Corps (NOJC), see PRH Change Notice No. 05-17 and PRH Appendix 307, in conjunction with Job Corps Regional Offices (ROs) and Center Directors. All changes in any of the above categories must be reflected through fully executed contract modifications initiated by the National Office of Job Corps (NOJC).
Unless a formal deviation of slots has been approved by the National Office of Job Corps (NOJC), HBI must offer training programs in accordance with the student/instructor ratios listed below.

### 3. BASIC RESPONSIBILITIES FOR PROGRAMS AND SERVICES

HBI, in collaboration with centers where HBI programs operate and provide services, and to the extent that adequate resources are made available, must provide all necessary administrative and training personnel, services, off-center administrative facilities and materials, and staff travel and subsistence required to accomplish contracted training services with Job Corps. HBI must deliver these in accordance with the:

- Workforce Innovation and Opportunity Act (WIOA)
- Job Corps Policy and Requirements Handbook (PRH), as well as other Job Corps instructions and policy issuances
- Career Development Services System (CDSS)
- Memorandum of Understanding (MOU) signed by an HBI Executive or designee and each Center Director or designee where HBI operates career technical training programs

The following are specific responsibilities for HBI and all Center Directors where HBI programs exist:

#### a. NTC Operation Plan – HBI must develop, in conjunction with centers and Regional Offices (ROs), as appropriate, an Operation Plan and submit it to the Job Corps National Contracting Officer’s Representative (COR) within 90 days of the plan template being available following final definition of contract terms and award in the base year. For each option year, provided that the National Office of Job Corps (NOJC) extends the contract with HBI, HBI must revise its Operation Plan and submit a summary of all changes, if applicable, to the COR within 60 days of contract extension award. In accordance with Job Corps policy, regulations, and requirements, the Operation Plan should contain detailed descriptions of HBI’s Job Corps Program’s administrative structure, operation systems, and processes for recruitment, training, placement (including Registered Apprenticeship programs), and follow-up services to students; HBI staff qualifications and annual professional development plans, and activities to align training to the latest industry skill/training standards. The format of the Operation Plan can be similar to a Job Corps Center Plan.
b. **Industry Skill/Training Standards** – HBI must provide training programs that lead to high growth, high demand, and high wage positions in the construction industry. HBI must align all their technical training programs to the latest skills/training standards of the construction industry.

c. **Training Outcomes** – HBI must provide assigned students training in career technical, career success, and applied academic skills so that they become agile workers with expanded career options, and maintain long-term attachment to the labor market or educational opportunities. Specifically, training outcomes from HBI programs must include at least one of the following categories:

1. Students enter a Registered Apprenticeship training program leading to full journeyman status, a customized employer-based training program that leads to career opportunities

2. Students enter a specific area of the craft/trade that pays sustainable wages and offers the opportunity for long-term employment and career advancement, or enter the U.S. Armed Forces

3. Students enter a community college or technical training school-level program to pursue further technical training or degree-based education, if they choose not to pursue further training or job placement in the occupation for which HBI has provided the training

d. **Placement Services** – To the extent that adequate resources are made available, HBI must provide initial job placement services for the period of time specific in PRH Chapter 4, 4.2, R2.a from separation, to the graduates of their programs. In addition to job placement services, HBI may also provide career transition support services to graduates, such as making arrangements for housing and transportation, where HBI has the capability to effectively deliver such services and the provisions of such services has first been coordinated with the designated career transition services (CTS) provider.

HBI instructors and field staff must work collaboratively with Job Corps regional officials and center staff to ensure that HBI-provided job placement and, as applicable, CTS, are coordinated with the development and implementation of each center’s CDSS Plan.

e. **Enrollment of Female Students and Instructors** – As an entity that provides instruction and job placement in trades predominantly occupied by males, HBI must make every effort to recruit female students to achieve meaningful improvement in the number of female graduates.

In an effort to achieve the above objective, HBI must develop and use creative and effective techniques and strategies during Outreach and Admissions (OA) and the Career Preparation Period (CPP), to educate and interest female students in careers in...
construction. As applicable, HBI will work closely with Job Corps Regional Office officials, recruitment contractors, the national public relations contract staff and center staff who manage CPP about adopting such recommendations. HBI is also encouraged to seek and develop meaningful partnerships with local, state, and national organizations that provide assistance in recruiting qualified female instructors, as vacancies occur.

Center Directors and/or designated staff must support HBI in recruitment efforts.

f. **Collaboration with Other Job Corps Entities** – HBI must establish and maintain open and professional communication with the United States Department of Labor (USDOL) regional officials, center staff, center operators, and OA and CTS contractors. The National Office of Job Corps (NOJC) encourages HBI to work with all related entities referenced above, within established protocol, to address and resolve areas of concern prior to seeking the involvement of the NTC COR and the National Office of Job Corps (NOJC). HBI must conduct a minimum of one video or teleconference meeting with each USDOL Regional Director in each program year to synchronize goals, priorities, and solutions to problems. Center Directors must provide corresponding cooperation to HBI in all areas related to HBI contracted services.

g. **Center Curriculum Development** – HBI must have appropriate staff fully participate in the curriculum development process at each center where HBI operates a career technical training program. This includes serving as an active member of the center Curriculum Development Committee and, if authorized by HBI national executive, sharing HBI-developed instructional resources, techniques, and methods that contribute to student success.

Standards-Based Education and Training – HBI must fully support the advancement to standards-based education and training across all Job Corps Centers. When fully integrated, centers will have incorporated some or all of the following components: Industry or CTT Foundations courses, student cohorts, evening studies, revised CTT schedules for students, multi-step instruction for students, and assigned collaboration time for staff. HBI will be required to participate in the associated staff development sessions and collaborative meetings, as applicable. HBI must work collaboratively with the Job Corps centers, Regional Offices, and National Office staff to implement required Job Corps policies applicable to HBI CTT providers.

h. **Center Workforce Council and Business Community Participation** – HBI must fully support the functioning of the Center Workforce Council, and the center’s business and community activities, including the Community Relations Council, to improve the quality of career technical training programs and creating meaningful linkages with individual employers; labor and business organizations; American Job Centers and partners; state and local Workforce Development Boards; and youth standing committees, where established.

On centers where HBI career technical training programs operate, the HBI instructors or Field Coordinator must serve as the primary contact(s) for communications with HBI
affiliated unions, district council, association, or organizations and employers signatory to HBI local and national agreements. Further, HBI instructors and Field Coordinator must fully assist CTS contractors and center staff in obtaining accurate graduate placement and upgrade verification information through CIS case notes and other methods of contact.

i. **Disability Issues** – HBI must follow all federal laws, government regulations, and Job Corps policy related to accommodations for students with disabilities. HBI must work closely with the Center Director’s designee on disability issues to ensure that students with disabilities who are interested in HBI trades are provided reasonable accommodations/modifications, if needed, to perform the trade-related skills required by the Training Achievement Records (TARs). HBI must ensure that no Job Corps student with a disability is denied entry into HBI programs for any discriminatory reason.

j. **Safety** – HBI must follow federal, state, local, center, and HBI-specific safety regulations and requirements during the technical training process, and in cooperation with center officials, ensure that all training areas are clean and well-maintained. HBI must advise the centers and NTC COR, in writing, of current industry standards and employer/partner specifications in terms of safety design, requirements, and operation in the training facilities on centers. Additionally, HBI instructors are required to ensure full tool inventory, accountability, and security, ensuring that all tools are accounted for before the end of each class, or the end of each day if off-site, and ensuring that all tools that are unaccounted for are found and all tools are secured.

k. **Recruits From Industry/Business** – As applicable, HBI must inform local unions, other established business/industry affiliates, apprenticeship committees/councils, contractors, and individual employers, of the opportunity to refer potential employees, who are eligible for Job Corps, to related HBI training at Job Corps centers. HBI staff must coordinate with the appropriate OA contractor(s) and center staff to ensure the availability of program openings prior to finalizing arrangements for potential enrollees. Center Directors and designated staff must support HBI in such recruitment efforts.

l. **Student Selection of HBI Programs** – HBI must follow center procedures for the assignment of students to career technical programs. To the greatest extent possible, these should include the participation of HBI instructors in the selection process, and providing students an opportunity to learn as much as possible about HBI specialty training programs before final selection, including an opportunity to observe and participate in daily training activities.

In accordance with PRH Chapter 1, 1.1, R1.e, Job Corps-qualified applicants referred to specific HBI programs by the groups cited above in “k. Recruits from Industry/Business” must be admitted to those programs. These students, as all others, are first required to participate in and successfully complete all activities included in the center’s CPP, the only exception being an activity directly related to the selection of a trade. However, in the event that a student in this category expresses interest in exploring other trades, and
selects another trade, he/she must be permitted to do so.

Center Directors and designated staff must collaborate with HBI in such trade selection efforts.

m. Enrollment Criteria for HBI Programs – The specific selection criteria for students participating in HBI training programs are as follows:

(1) Age

No student can be denied access to an HBI program because of age. However, because most HBI programs and related employers, as a condition of employment in the construction industry, require applicants to be at least 18 years of age, and certain HBI trades have significant safety-related responsibilities, the Center Director, or his/her designee, and HBI instructor(s)/Field Coordinator must jointly address these issues. Based upon relevant factors, particularly student safety, but also including demographics and employment opportunities, a solution must be agreed upon that will not adversely impact students or HBI performance.

(2) Driver’s License

Students in HBI programs must be provided every opportunity to obtain a valid driver’s license before they graduate. Employers in the industries served by these programs consider a driver’s license an essential tool in securing and maintaining employment. Students who had their driver’s licenses revoked due to previous violations, etc. must not be enrolled in HBI programs requiring a license as a condition of employment.

(3) Health

Unless the Center Physician determines that participation in a particular program would be a direct threat to the student, other students and/or the instructor, the condition of a student’s health must not be a factor affecting his/her participation in an HBI trade. In this regard, and in accordance with Job Corps Program Instruction No. 01-11, dated November 27, 2001, HBI is not authorized to collect information, formally or otherwise, regarding the health, disability status, or history of a potential enrollee, or a student who has or has not, as yet, entered an HBI trade. These matters are solely within the purview of the Center Physician (see PRH, Appendix 302).

The center must maintain a Respirator Medical Evaluation Program in compliance with OSHA (29 CFR, Part 1919.134 App. C). Students must be approved for training by the Center Physician prior to the student’s assignment to applicable HBI training programs. A copy of the signed approval must be provided to the HBI instructor for his/her records.

Once a student is enrolled in a HBI program, the Center Physician and wellness staff
are responsible for immediately notifying HBI instructors when a student’s health condition, including prescribed medication, may be aggravated by certain training activities or environmental conditions associated with particular training activities.

For students with disabilities who have a reasonable accommodation plan, HBI instructors will ensure that the reasonable accommodations/modifications indicated in the plan and provided by the center operator are made available during training. The center disability coordinator will inform HBI instructors and/or the supervisors of the existence of an accommodation plan for a particular student.

(4) Academics

Students must have a proficiency level in reading and math that will enable learning in a HBI trade, understanding and following instructions and, where applicable, adhering to safety regulations and procedures. These proficiencies are particularly essential for trades that require proper use of power tools, equipment, machinery, and adherence to specific Occupational Health and Safety Administration (OSHA)/industry safety guidelines. HBI will work closely with center staff to ensure every student is given an opportunity to become proficient, in order to succeed in his/her chosen training program(s).

4. STUDENT TRAINING

a. **Career Preparation Period (CPP)** – During the CPP, HBI instructors must assist and collaborate with center staff to train all students to learn, demonstrate, and practice personal responsibility and career success skills required at the workplace.

b. **Career Development Period (CDP)** – HBI instructors must work collaboratively with center officials and staff to ensure that student learning and training experiences, including those arranged through employer partnerships, meet center-based and Work-Based Learning (WBL) standards described in the PRH.

(1) **Work-Based Learning** – HBI instructors must work in partnership with appropriate center staff in establishing meaningful Work-Based Learning (WBL) opportunities associated with HBI trades. Work experience for students will reflect a balance between Career Technical Skills Training (CTST) projects and WBL opportunities. This includes, but is not limited to, the creation of opportunities for all HBI students to observe work-site activities early in the career technical training, as well as for qualified employer representatives to be present during CTST activities to provide meaningful advice and guidance to students regarding their employability and career technical skills as well as their adherence to established safety and health standards.

(2) **Assessing Student Readiness for Work-Site Assignments** – During the Career Development Period, there must be a process for determining each student’s readiness to benefit from work-site experience. This process includes input from all relevant components at the Job Corps center, including HBI instructors.
(3) Standards-Based Education in CTST Projects – HBI instructors and field staff must work cooperatively with center officials and staff to make CTST and WBL opportunities viable learning experiences that incorporate Job Corps applied academic standards for the construction industry. In this regard, HBI instructors will be actively involved in the development and teaching, including coordinated instruction and team teaching, of lessons that include construction industry applied academic standards. HBI instructors will also use evidence-based instructional approaches identified by Job Corps to support standards-based training to the extent funding is available.

(4) Management of Class Size – HBI will ensure that the staff to student ratio is maintained at the contracted level at all times. Students will be assigned to fill slots that are open due to activities such as WBL, full-time academics, or career transition readiness assignments. If class sizes drop below 60%, HBI instructors must assist with the following:

- Monitoring existing WBL sites and helping to develop new sites
- Strengthening working relationships with local unions, employer organizations, and individual employers/contractors
- Working with Job Corps entities to plan and establish various career technical training clusters
- Working with academic instructors to develop relevant academic lessons
- Providing short-term (up to 10 days) introductory training to students on the waiting list for HBI trades, who continue to have a strong desire to enter and complete the trade

c. Career Technical Skills Training (CTST)

(1) Planning – CTST projects must be planned for each program year in accordance with the PRH. The Center Director must designate a qualified, competent center staff member to plan and oversee all CTST projects. HBI instructor(s) must assist this individual in developing and carrying out the CTST Plan. HBI’s designee and the Center Director’s designee must each sign off, or provide a letter of concurrence, on the annual CTST Plan and any modification to the plan, including a Safety Hazard Analysis for each project in the CTST Plan, prior to submitting the plan/modification to the Job Corps Regional Office (RO).

(2) Developing CTST Opportunities – In cooperation with the Center Director’s designee, HBI staff and appropriate local community members/officials will make every effort to develop CTST opportunities that support student learning and meet not only the center’s needs, but community needs as well. Community projects expand community ties and student participation in community activities.

(3) CTST Meetings – The individual designated by the Center Director to oversee CTST projects must initiate coordinating sessions with HBI instructor(s) involved in CTST
projects. These meetings must be scheduled at least biweekly for the purpose of: assessing the progress on current CTST projects, reviewing/adjusting the plans/schedules for the next 2-week period, ensuring that all issues and concerns related to job safety and scheduling are satisfactorily addressed, and formulating long-range plans. Minutes of each meeting will be maintained by the Center Director’s representative and copies provided in a timely manner to all attendees as well as to those who were not present.

(4) **Off-Site CTST Projects** – Off-site assignments (i.e., community projects and Spike Camps) will not be approved unless they meet all requirements of the PRH, including those for education, supervision, safety, residential, and support services commensurate with those at the center. HBI instructors must not be assigned responsibility for the supervision of students after normal working hours, unless prior arrangements have been made and agreed upon by all appropriate parties. Where CTST assignments make it necessary for HBI staff to live at the CTST site, the prevailing General Services Administration (GSA) per diem rate will apply. In the event housing is provided, the prevailing GSA, Meal and Incidental Expenses (M&IE) rates must be applicable and paid for by the center operator.

(5) **Student Involvement in CTST Planning** – HBI instructors must involve students in the planning of CTST projects. Further, academic instruction and career success standards training, in addition to the application of technical skills, must be incorporated in all CTST projects as part of the overall learning experience and the skills essential for success on the job.

d. **Related Training Issues**

(1) **Realistic Working Environment** – All HBI training must be conducted in an environment and under conditions as close as possible to those found in the construction industry, and, as applicable, must be the same as required for apprentices as outlined in the craft Apprenticeship Training Standards published by the USDOL’s Office of Apprenticeship, when such training standards exist.

(2) **TAR Completion and Certification/Apprenticeship Enrollment Test** – HBI must ensure instructional materials are upgraded as necessary to remain aligned with the latest construction industry and/or apprenticeship skills/training standards. HBI TAR(s) must be developed and formatted in a manner consistent with these standards.

HBI must assist each student completing an HBI program to take the appropriate industry certification or qualifying test for apprenticeship training programs, if applicable.

(3) **Career Success Skills** – Throughout their training, students will be taught the importance of attaining and applying the career success and applied academic standards listed in each TAR. They will be provided assistance and support in mastering and demonstrating these skills during their career technical training
experience, including CTST and WBL.

(4) Scheduling – HBI staff must work closely with center staff to develop student schedules. Every effort must be made to schedule students to attend career technical classes for the maximum period per day, including an appropriate amount of time for lunch. However, the training day may be less than the traditional eight hours to accommodate activities that clearly and directly support students’ success in securing and retaining training-related employment. For example, the time required by both academic and HBI instructors to plan for curriculum integration, establishing mentoring arrangements and WBL sites with employers, fall into this category. Such exceptions notwithstanding, and in accordance with the PRH, “Centers must: develop a schedule which ensures that, prior to graduation, students receive substantial practice and experience in working an 8-hour day, or working hours and conditions consistent with the anticipated workforce.”

(5) Hands-on Training vs. Classroom Instruction – Hands-on training and related shop-classroom instruction must be divided approximately 70% and 30%, respectively.

(6) Training Week – A standard training week must be 40 hours, Monday through Friday, excluding center-observed holidays.

(7) Length of Training – HBI must require students to receive technical training in a time frame commensurate with typical industry time requirements for technical training, before being eligible for graduation. The HBI instructor has the responsibility to determine when a student has satisfactorily completed all training requirements and is capable of performing pre-apprenticeship level skills at a training-related work site.

(8) HBI Instructor Supervision – During the training period, HBI instructors must be responsible for:

- *Center Safety and Occupational Health Plan*, as well as industry, state, local, and OSHA trade-related safety rules, regulations, and standards
- Center rules and regulations, including those pertaining to safety
- Student conduct standards
- Student accountability, including and especially during CTST projects and activities

HBI instructors must work closely with the Center Safety Officer, and the Health and Wellness Manager/Administrator, on all matters concerning the health and safety of students.

e. Student Conduct Standards

(1) Student Conduct Standards – HBI staff must use Center Director-established student conduct standards and disciplinary procedures as the basis for dealing with any significant student problem while in career technical training.
(2) **Suspension and Dismissal of Students for Safety and Disciplinary Reasons** – To prevent injuries to students/instructors, HBI instructors have the authority to immediately suspend from class a student who has violated safety/disciplinary rules or regulations. In these situations, HBI instructors must advise the Center Director of the action taken as soon as practicable, with adequate documentation. Further, HBI instructors must recommend to the Career Technical Training Manager and Center Director the permanent removal of students from HBI trades who continue to disregard safety rules and procedures, with adequate documentation.

HBI instructors must be part of the center’s process for determining the readmission of such students to HBI classes.

f. **Student-Related Activities**

(1) **Involvement With Center Activities** – HBI instructors must be actively involved with center officials and staff in helping to establish programs, activities, and training conducted during the CPP as defined in PRH Chapter 2.

(2) **Evaluation of Student Progress Panel** – HBI instructors must actively participate in the Evaluation of Student Progress (ESP) panels for students enrolled in HBI training programs. HBI and center staff will work cooperatively to ensure that the scheduling of these activities results in the least disruption to career technical training classes.

(3) **Coordination of CTS for Graduating Students** – HBI instructors must notify appropriate center staff, on a timely basis, when students are within 60 days of career technical training completion, so that career transition planning can be initiated. However, in those instances when a training-related job becomes available on short notice, particularly a Registered Apprenticeship opportunity, HBI instructor and center management must work expeditiously to ensure that the scheduling of career transition readiness activities is not a deterrent to the job-related placement of the graduate. In this situation, every effort will be made to provide departing graduates with transition allowances and WBL funds, ensure that they receive all appropriate transitional services, and where applicable, meet with assigned CTS staff.

(4) **Driver Education** – HBI must work closely with Center Directors in support of each center’s responsibility to provide driver’s education training for all eligible students beginning in the Career Preparation Period. This is especially important for those students assigned to the construction trades. HBI must make every effort to collaborate with center management to help students attain a valid driver’s license or learner’s permit before graduation.

5. **HBI STAFF RESPONSIBILITIES**

a. **HBI Field Staff/Coordinators**
(1) **Monitoring Performance** – HBI field staff must be fully knowledgeable about the performance of HBI programs and instructors. As required by the Career Technical Training Reporting and Improvement System (CTTRIS), for individual training programs performing below established standards or on probation, HBI field staff must work collaboratively with the instructor, as well as center and regional staff, to develop, implement, and monitor Program Improvement Plans (PIPs). HBI field staff must actively participate in the Regional Appeal Process for their programs facing sanctions, including closure and reduction. In this regard, also, slot utilization is a cost-effectiveness issue that must continually be monitored. When warranted, HBI field staff must collaborate with centers and Regional Offices (ROs) to effectively address issues related to slot utilization.

To ensure effective and efficient use of resources, HBI field staff will first make productive use of all available means of communication, including electronic, and fully assess performance reports generated by the Job Corps Data Center and HBI, before center visits are planned. Center travel must be limited to situations where face-to-face contact is absolutely essential.

(2) **Technical Assistance** – HBI will supply structured training in classroom management. Instructors will be expected to deal effectively with a wide range of student behaviors. When necessary, regional field staff must provide additional training in a timely fashion.

(3) **Interaction With Center Activities** – HBI field staff must ensure that HBI instructors are contributing to the effectiveness of the center CDSS Plan, and the goals of the overarching program. Performance standards must reflect a team approach with center and career transition staff to ensure students have every opportunity to achieve their goals.

(4) **Actions on Staff Issues** – Where significant problems associated with a particular HBI instructor are verified, either in the performance of his/her basic responsibilities or as a participant in other center activities and programs, HBI field staff must take immediate and appropriate corrective action. If warranted, such action may ultimately include the permanent removal of an HBI instructor. However, before a final decision of this type is made, the Center Director and assigned regional COR/Project Manager must be notified. These individuals must have the opportunity to expeditiously assess the impact of such a decision on the operations and administration of the center, and to share this information with the appropriate HBI official(s) for consideration prior to a final decision being made by HBI.

(5) **Business Linkages** – HBI field staff must play a vital role in establishing meaningful relationships with business agents and other local union officials, business councils, and affiliated organizations in labor markets where students return to seek employment in the construction industry. Such efforts are intended to promote and establish Registered Apprenticeship and other career opportunities for qualified
graduates.

(6) Communication With Center Directors During Visits – As stated above, while effective use of desk monitoring, conference calls, and e-mail is strongly encouraged, HBI field staff will visit centers, when justified. To the extent practicable in these situations, the Center Director must be notified in advance of visits. Further, following each visit, HBI field staff must conduct an exit conference with the Center Director, or his/her designee, and other officials, as appropriate, to review significant findings, and address issues affecting program performance, particularly if the program is on probation and/or under a PIP.

(7) Communication With Regional CORs/Project Managers – HBI field staff must also establish and maintain contact with appropriate Regional CORs/Project Managers concerning HBI programs and instructor performance, as well as significant findings/issues resulting from monitoring that could not be resolved at the center level. HBI field staff are strongly encouraged to share monitoring reports with appropriate project managers, especially for those programs on probation and/or under a PIP.

b. NTC Instructors

While HBI instructors perform as part of an HBI national contract, they must cooperate with and be a part of the center and its operation. As required of all center staff, HBI instructors must function as mentors, models, and monitors of all Career Success Standards when working with students. In addition, they must be active partners with center staff in evaluating student progress and meeting students’ needs in support of their social and career development.

(1) Career Technical Training – HBI instructors must plan, deliver, and evaluate career technical training to Job Corps students in various specialty areas, including both classroom instruction (theory learning) and hands-on practices (Career Technical Skills Training and Work-Based Learning). Instructors are expected to provide students the opportunity to complete all required Training Achievement Records (TARs) in their chosen program. They are also expected to train students to be sufficiently competent to enter: a Registered Apprenticeship training program; a high growth/high demand/high wage occupation for career development; a community/technical college for advanced training; or the U.S. Armed Forces, and earn a passing score on written and/or performance tests associated with nationally recognized certification and/or state licensure, as applicable.

(2) Professional Development – To the extent that adequate resources are made available, HBI instructors must participate in all professional development activities sponsored by HBI, centers, Regional Offices (ROs), and the National Office of Job Corps (NOJC), as applicable, to increase their effectiveness in developing and delivering standards-based integrated instruction; coordinating instruction; utilizing evidence-based instructional techniques; and implementing effective student-engagement strategies.
(3) **Role-Modeling** – HBI instructors are expected to serve as role models for students. Any abusive or other inappropriate behavior by instructors toward students or staff, failure to properly supervise students and maintain order, effectiveness, and safety, or a disregard for center rules and regulations, will not be tolerated and will result in disciplinary action, possibly the loss of employment. HBI field and headquarters officials must take immediate and appropriate action when such incidences are verified. Where an NTC fails to respond expeditiously and adequately, the NTC COR will become involved and initiate whatever corrective actions/measures may be needed.

(4) **Communication With Center Staff** – HBI instructors must periodically communicate with other center staff who also serve HBI students in other program areas (e.g., academic and residential). The purpose of such contact is to determine if HBI students are meeting their responsibilities in these other required activities, and especially to identify students having problems that could lead to early separation if not dealt with immediately and effectively. Where this appears to be the case, the HBI instructor, acting as a role model, must endeavor to positively influence the student and steer him/her in a better direction.

The responsibility described above is in addition to HBI instructors’ participation in Evaluation of Student Progress (ESP) panels, and is primarily intended to prevent Zero Tolerance (ZT) terminations, UAs, etc., and increase the number of HBI career technical training graduates and placements.

(5) **Center Activities** – HBI instructors are expected to support and participate in pre-planned, scheduled activities/projects that have been established by center officials and staff to support center goals and objectives. Such activities/projects, which usually involve most center components, may take place outside of normal working hours, including weekends, and at sites other than the Job Corps center.

(6) **Business Linkages** – HBI instructors must play a vital role in establishing meaningful relationships with business agents and other local union officials, business councils, and affiliated organizations in labor markets where students return to seek employment. Such efforts are intended to promote and establish Registered Apprenticeships and other career opportunities for qualified graduates, and will be carried out to the extent that adequate resources are available for this purpose.

(7) **Driving Compliance** – HBI instructors must comply with all related PRH and HBI/center-specific requirements related to driving privileges for employment as well as operating NTC/Center/GSA vehicles. When requested by center officials, HBI instructors who use center vehicles must show proof of a valid driver’s license. HBI instructors will also immediately notify appropriate center officials of any changes/restrictions to their licenses, when these occur.
6. **RESOLVING ISSUES**

   a. **Process for Resolving Issues** – HBI instructors must work cooperatively with Center Directors and appropriate staff to informally resolve all issues. Where necessary, these efforts must also involve the assigned Field Coordinator, HBI headquarters officials, and the regional COR/Project Manager. However, in the event that an informal resolution is not possible, the HBI leadership must immediately request the assistance of the NTC COR; concurrently, the Center Director must notify the assigned Regional COR/Project Manager to assist in the resolution process.

   The NTC COR and Regional COR/Project Manager will work cooperatively and expeditiously to fully investigate matters that could not be resolved informally, and jointly render a final decision that will be binding on all parties involved. However, if this is not achievable, the Job Corps National Deputy Director shall be the final arbiter. At no time during this entire process shall the Center Director or NTC officials/staff, including field staff and instructors, take any action that could adversely affect the training of students in the HBI program or functioning of the center.

   b. **Center Request(s) for HBI Personnel Change(s)** – In the instances where the Center Director requests permanent removal of an HBI instructor, such requests must be in writing and concurrently transmitted to the NTC COR and the designated Regional COR/Project Manager, with copies to the assigned HBI Field Coordinator and HBI executive leadership. The written communication must include the specific reason(s) justifying the request for removal, along with any documented violations of center rules, operating policy, etc., that were committed by the instructor in the past. In consultation with the organization’s human resources and legal staff, HBI will follow its policies and procedures in determining the appropriate course of action.

   c. **Center Request(s) for HBI Program Change(s)** – In the instances where the Center Director requests the permanent addition or removal of an HBI training program, such requests must be submitted to the Job Corps National Office, through the Regional Director who must approve the request. All requests must be submitted in accordance with Appendix 307 - *Job Corps Career Technical Training Change Request*. The request must be developed in collaboration with the center operator, the regional COR/Project Manager, and HBI. The Job Corps National Office will make a final determination of the request after verification of all facts and reasoning in conjunction with all related parties.

   d. **HBI Request(s) for Program Change(s)** – To initiate any changes to the contracted training programs (program and slots), HBI is required to follow the Career Technical Training Change Request process established by the National Office of Job Corps (NOJC), see PRH Appendix 306. Following approval from the Regional Office (RO), the National Office of Job Corps (NOJC) will make a final determination of the request after verification of all facts and reasoning in conjunction with all related parties, including centers and Regional Offices (ROs). The DOL Contracting Officer and the NTC COR will develop and execute a Contract Modification for each HBI program change,
following approval from the National Director of Job Corps.

The above four provisions apply to all Job Corps centers where HBI programs operate, including agency-operated centers.

7. PERFORMANCE

a. Annual Performance Assessment – HBI performance must be evaluated annually by Job Corps regional staff, the NTC COR, and other appropriate Job Corps National Office staff, using data from the Career Technical Training Report Card (CTTRC) and assessment mechanisms specific in the PRH Appendix 501d. For programs that have performed at the “unsatisfactory” level (Grade ‘D’ on the CTTRC) for one year and have been recommended by the National Office of Job Corps (NOJC) for probation, HBI must develop a Performance Improvement Plan (PIP), in cooperation with affective centers and Regional Office (RO) staff. A copy of the PIP will also be submitted to the NTC COR. HBI must work with appropriate center management and regional officials/staff to implement PIPs so that performance outcomes of such programs in the following program year will be elevated to the “average” level (Grade ‘C’), at a minimum.

For programs that have performed at the “unsatisfactory” level (Grade ‘D’) for two consecutive years, and recommended by the National Office of Job Corps (NOJC) for closure or slot reduction, HBI can develop, in close cooperation with related centers, an appeal to file with the National Office of Job Corps (NOJC). Following the appeal process, the National Office will render a final decision, which could result in program closure or slot reductions.

b. Registered Apprenticeship Placements – HBI must develop and maintain a productive and meaningful relationship with associated local unions, Registered Apprenticeship programs, district councils, national/regional/local business-industry organizations, and individual employers that can place Job Corps graduates into Registered Apprenticeship training programs and other meaningful career opportunities that offer sustainable wages. In addition to meeting all performance expectations stipulated in PRH Appendix 501d, HBI staff are expected to annually increase graduate placement into Registered Apprenticeship programs and/or industry-based training programs or employment, based on historical data and realistic projections and with consideration of local, regional, and national economic conditions impacting the construction industry.

Where applicable, HBI must collaborate with specific employers to develop and implement training programs/modules tailored specifically to their labor needs.

Job Corps centers are expected to cooperate with HBI in placing graduates in Registered Apprenticeship programs and training-related jobs. In this regard, it is particularly important for centers to ensure that prior to graduation HBI students have an opportunity to secure a valid driver’s license.
8. **REQUIREMENTS FOR FACILITY, EQUIPMENT, AND SUPPORT SERVICES**

In consultation with appropriate unions, industry groups, individual employers, and OSHA (as well as state and local OSHA counterparts), HBI must determine the equipment, tools, materials, and supplies necessary to ensure quality training and protect students'/instructors’ safety and health. As appropriate, these activities will be coordinated with the Center Safety Officer and/or the Health and Wellness Manager/Administrator.

The Center Operator must provide HBI with appropriate and adequate career technical shop training, administrative space, and the support services described below. Subject to a center’s fire, security, and related safety policies, HBI will be responsible for maintaining security of the assigned space during training hours – including the establishment of a limited access policy.

HBI shall work cooperatively with centers to implement these policies to ensure effective maintenance, stewardship, and accountability of government-owned personal property during normal HBI operation hours and in accordance with all government property management regulations and requirements.

The center operator shall provide HBI, at no cost, the following equipment and support services as part of the center operator’s contract.

a. Shop and career technical training equipment, materials, and supplies (a detailed listing of equipment by HBI for each career technical training program that they offer at a specific center must be included as part of the MOU) (Desks and chairs for classrooms will also be provided.)

b. Reasonable accommodations/modifications, where needed, to provide students with disabilities the opportunity to successfully complete the TAR(s) required in the trade

c. Acquisition, maintenance, repair, and replacement of career technical and administrative equipment

d. Telephone installation in instructor offices and ongoing service, including local and long distance service, in support of providing job development, placement, transition support services, follow-up activities, and for other official Job Corps business (In addition, cell phones will be provided to HBI instructors when working with students off center, or at remote areas on center, to ensure that the need for medical/emergency support can be quickly communicated.)

e. Fax and copying services in instructor offices (Where this is not possible, other arrangements must be in place that are convenient for instructors to use such services.)

f. Safe and adequately equipped vehicles to support training activities/projects

g. Mail (postage)
h. Trash and garbage collection

i. Utilities

j. Locking file cabinets

k. Computer equipment (This includes hardware and software in each HBI instructor’s office, capable of accessing the Internet, CIS3g, CTS, and the Job Corps Community Website. It also includes hardware and software in each HBI classroom/shop, capable of accessing the Internet, to support student learning. Instructors will also be provided with a printer. Computer training, if scheduled for center staff, must also be made available to HBI staff.)

l. DVD/CD players, VCRs, monitors, and related equipment, as necessary, to support training

m. Transportation and meals for students participating in CTST, Work-Based Learning, and other work-experience activities

n. Fire protection and OSHA-approved safety programs at career technical facilities

o. OSHA-required safety equipment (e.g., eye, hand, face, and fall protection), and other personal protective equipment that is required in the trade and meets OSHA and industry standards

p. The provision of Federal Tax Credit Conditional Certifications for eligible graduates, prior to separation, as long as these programs continue to be statutorily authorized and target-group documentation is accessible

q. Student career technical training clothing including, where applicable, special and foul weather clothing, hard-toed safety shoes, and replacement items, including those students who may be assigned by the center above the contracted class/surge level (HBI is contracted to provide hard hats to students. Clothing provided must have the logo of the NTC clearly visible, as applicable, and when financially feasible.)

r. Appropriate attire for CTST projects and Work-Based Learning assignments and, as applicable, requirements imposed by OSHA, state law, and industry standards, as well as the specific job site

s. Immediate and accurate entry into the CIS, the following HBI-provided information/data: (a) career technical student data, including entry dates and completion status, as they occur; (b) any and all corrections, when notified by HBI along with verification to HBI when the corrections are made; and (c) placement results, as determined by the center or as provided by HBI

t. Copies of the 6-78 Forms and CTTRC 10 and 20 Reports, or subsequently developed career technical training performance reports, on a regular and timely basis, and provision of quality
staff training regarding the CTTRC reports, when necessary
u. Shipping tool kits to students, when required by HBI programs

v. Transportation to and from Work-Based Learning/WEP/CTST sites, industry.trade
certification-accreditation sessions/tests, and job interviews

w. Consistent with the Center CDSS Plan, as described in the PRH, HBI staff will be a part
of all training designated for career technical instructors, including standard First Aid and
CPR

x. Secretarial/clerical assistance, when the need is justified

y. Security for career technical training facilities, including on-center CTST sites, outside of
normal working hours

9. TRAINING MATERIALS AND SUPPORT

a. Instructional Materials – HBI must provide each student and instructor with
instructional materials and publications, as necessary, to adequately conduct quality
career technical training. Training-related courseware (CD-ROM or Internet-based) or
videos that have proven to be successful in supporting classroom instruction will also be
made available by HBI, as well as an updated listing of Internet websites that contribute
to student learning and the professional development of HBI instructors.

b. Student Tool Kits – HBI must provide tool kits for students in training, in accordance
with established policy in the PRH. Tool kits must be made available at no cost to HBI
students who successfully complete career technical training and obtain a job training
match upon initial placement. A copy of approved tool lists must be provided to Center
Directors by HBI.

HBI will work in partnership with the Center Director to ensure that the tool kits meet, as
much as practicable, the needs of the industries involved so that students can be
successful in securing and retaining training-related jobs.

10. AUTOMATED CAREER TRANSITION SYSTEM (CTS)

It is imperative that HBI comply with Job Corps policies (Program Instructions No. 06-08 and
No. 06-25) to safeguard students’ Personally Identifiable Information (PII), and use the CDSS
Suites of Job Corps’ Center Information System (CIS3G) exclusively for all data purposes
related to recruitment, training, placement, follow-up, and other student services. HBI must also
protect students’ PII in all the paper-based documents, including TARs, in accordance with Job
Corps policies and procedures.

Center Directors must collaborate with and provide assistance to HBI to meet this important
requirement.
a. **Data Entry into CTS** – HBI instructors and field staff/coordinators must be responsible for the timely and accurate entry of the following data into the automated Career Transition System.

(1) Post-center contact with graduates including updated graduate contact information, job development, referral and placement activity, and transition support needs and services provided

(2) Upgraded information related to graduates, especially acceptance into Registered Apprenticeship programs, wage increases, and job training match data

b. **Verification of Placement Data by CTS Providers** – Each Career Transition Services (CTS) provider assigned an HBI graduate is responsible for verifying the placement, when HBI records such accomplishment in the CTS. Verification activities must be initiated by the CTS provider in a timely manner and, when this process is fully completed, the CTS provider has the responsibility to report the verified placement to the CIS as expeditiously as possible.

c. **Resolving Issues With CTS Providers** – If a CTS provider routinely delays the verification and/or placement reporting process, HBI must report this matter to the appropriate official in the CTS provider organization, the Center Director, and the assigned Regional COR/Project Manager, in an attempt to correct the problem. Where this is not successful, the NTC COR must be notified in writing including, at a minimum, the following information:

(1) The name of the CTS-provider (contractor) organization involved, and the dates and names of the organization’s official(s) contacted by HBI to resolve the delays.

(2) The HBI graduate’s name, student identification number, the date the placement was recorded in the CTS reporting system by HBI, and how many calendar days it took for the CTS provider to

(a) complete the verification process, and

(b) record the verified placement in the CTS.

Other pertinent information should be reported, such as: delay(s) that extend beyond the window for recording placements; the impact on annual performance results, and, if applicable, the future of the specific HBI training program where the student completed training.

11. **ADMINISTRATIVE PROVISIONS**

a. **HBI Staff Leave Provisions**

(1) **Workday** – The workday (starting and ending times) must be in accordance with center policy.
(2) **Annual Leave** – With the exception of emergencies, leave must be scheduled and coordinated with the Center Director sufficiently in advance to ensure that there is no adverse effect on center operations and that quality student instruction continues uninterrupted. Actual approval of annual leave is the responsibility of HBI and may be granted only after timely notification has been provided to the Center Director, or his/her designee, and his/her comments have been carefully considered by HBI.

(3) **Sick Leave** – To the extent practicable, HBI instructors are expected to notify the Center Director, or his/her designee, prior to the first scheduled class when sick leave must be taken.

(4) **Overtime** – No overtime or center holiday work must be performed unless requested in writing by the government and accepted by the NTC; overtime pay, when approved, will be reimbursed at the rate established for the area in which the work is performed.

b. **Substitute Instructors**

The Center Director must provide qualified substitutes for up to the first 10 working days that an HBI instructor is on sanctioned leave, or where there is an unexpected termination or resignation of an HBI instructor. After the first 10 working days, HBI is responsible for providing a qualified substitute or, as warranted, hiring a fully qualified replacement instructor.

c. **Time Sheet Verification**

HBI maintains full responsibility for the accuracy of time sheets through its electronic timekeeping system.
